

Christian Counseling Center Inc.

AD(H)D Assessment Package

Renewal Christian Counseling Center was approached by area doctors who identified a community need for program that accurately, and scientifically, assessed children (and Adults) for ADHD in an affordable way.

The 3 steps to our program include:

1. A full Social Work Assessment and Family interview, with a Psychosocial History.
2. A 22 minute Psychological Assessment called the Test Of Variable Attentions (T.O.V.A.) which is a computerized, video game that will give quantified data comparing the attention span of your child to others who are exactly their age. A Parent and Teacher Inventory called "The Conners" is also used to gather feedback and confirm the data gathered by the T.O.V.A.
3. Our Board Certified Child Psychiatrist reviews the data and gives recommendations to the child and family (in writing) before they meet a second time with the clinician to be debriefed on our findings. If a diagnosis of ADHD is warranted, medications are only one of a host of interventions that may be given. Findings are often sent back to the Primary Care Physician for medication treatment, or our Child Psychiatrist is also available to give treatment.
